## Variables and Expressions Homework

**Do 7HIS** (1) Complete the table by evaluating each expression for x = 2, 3, and 4.

| × | x + 5 | 17 – x | i | 9x | 144 |
|---|-------|--------|---|----|-----|
| 2 |       |        |   |    |     |
| 3 |       |        |   |    |     |
| 4 |       |        | - |    |     |

2. Complete the table by evaluating each expression for x = 3, 5, and 9.

| X | 16 + x | x - 3 | 12x | 90 ÷ x |
|---|--------|-------|-----|--------|
| 3 |        |       |     |        |
| 5 |        |       |     |        |
| 9 |        |       | ,   |        |

For problems 3 and 4, follow the directions in the script below:

$$4.7 + 15 - 6h + 4r - 10$$

Circle the variables.

Star the constants.

Box the operations.

Underline the coefficients.
