

MATH6

Distance Learning 2020

Mrs. Doolan - Mr. Millard - Mr. Sangha

Greetings Koala, Sea Turtle, and Otter Mathematicians!

We hope that you are well and enjoying your extra time at home this week. Although we are missing each one of you face to face, we are excited to be able to connect together online to continue our growth as mathematicians. We are hopeful that the learning we do together in this format will allow us to keep our skills sharp, our minds growing, and our relationships strong. We also hope to have some fun together along the way.

Each day of digital learning in math will be clearly defined so that you know exactly what you are responsible for completing. The lesson or task will be posted in the morning, and each teacher will have 'classroom hours' during the day where we are available by email or other digital means to students. During these times, you will be able to contact your teacher with any questions or concerns you may have that are keeping you from being able to complete any assigned work. We will do our best to make available to each of you any and all resources that will help you be successful in completing assigned work as we look to keep growing and learning as practicing mathematicians.

If for some reason you do not get an invitation to join google classroom, or you are not receiving updates through a previously set up classroom, then you should email your teacher and let them know that you are not currently in the learning loop. Your first math lesson should be pushed out Thursday morning, March 19th, by 9 am. If you do not receive the lesson by 9 am, please connect with your teacher so that we can get you up and running with your new work.

This is a new experience for everyone. We are looking to connect together in a way that will not only keep us responsibly learning, but also have us caring for one another in this very unique time. Our hard work is not only blazing the way for future moments that may come - it is meeting the unique challenge that is given to us today. Work hard, enjoy extra time at home, and know that the commitment we make to work away from school is our way of winning the day together for our school, for our communities, and for the world.

We will win together!

Mathematically yours,

Mrs. Doolan, Mr. Millard, Mr. Sangha
