Name Stev Dent

Finding LCM and GCF
With Prime Factorization

Math6
Period _____

My numbers: 18, 24

My common prime factors are:

Find Prime Factorization?

2, 3

$$\begin{array}{r} 3 \cdot 3 \cdot 2 \cdot 2 \\ \underline{6 \cdot 6} = 36 \\ \cdot 2 \\ \hline 72 \end{array}$$

$$\begin{array}{r} 3 \cdot 2 \cdot 3 \cdot 2 \cdot 2 = 72 \\ \underline{6} \\ 18 \\ \times 2 \\ \hline 36 \\ \times 2 \\ \hline 72 \end{array}$$

LCM = product of ALL Prime Factors
(in the Venn diagram)

= 3 · 2 · 3 · 2 · 2 = 72

GCF = product of ONLY the Common Prime Factors

= 2 · 3 = 6

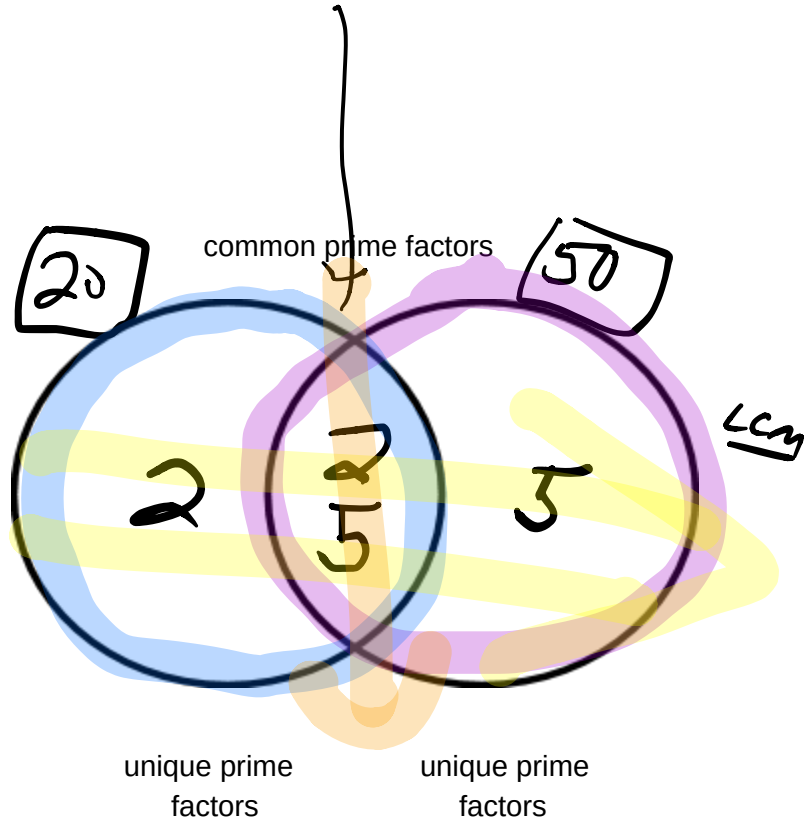

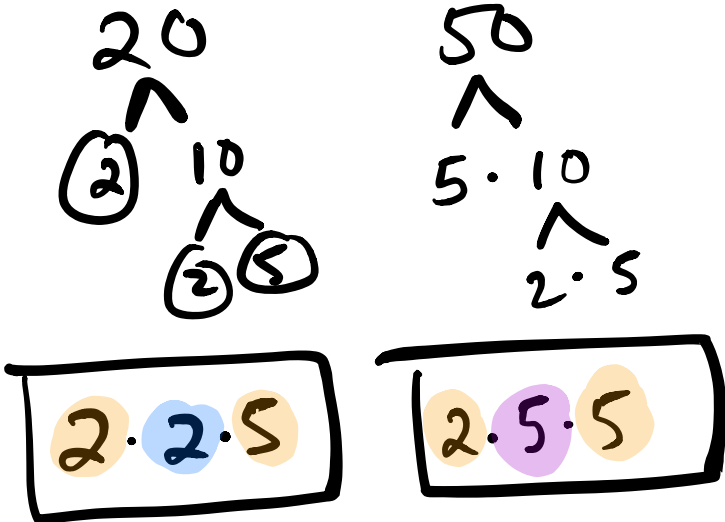

My numbers: 20, 50

My common prime factors are:

Find Prime Factorization?

2, 5

$$\begin{array}{c} 2 \cdot 5 \cdot 2 \cdot 5 \\ \vee \quad \quad \vee \\ 10 \cdot 10 = 100 \end{array}$$

LCM = product of ALL Prime Factors
(in the Venn diagram)

$$\begin{aligned} &= \underline{2 \cdot 2 \cdot 5 \cdot 5} = \boxed{100} \\ &= \underline{2 \cdot 5} = \boxed{10} \end{aligned}$$

GCF = product of ONLY the Common Prime Factors
